Digital Analytics & Integrations Specialist | GA4, GTM, Shopify, BigQuery & Reporting

PROFESSIONAL SUMMARY

Digital analytics specialist who helps teams trust the numbers they use to make decisions. I build and clean up GA4, Google Tag Manager, Shopify/e-commerce tracking, server-side tagging, BigQuery/SQL reporting, Looker Studio dashboards, and CRM/ad-platform integrations. I'm comfortable walking into messy analytics setups, finding what is broken, working with developers to fix it, and explaining the impact clearly to marketers, operators, and client stakeholders.

ROLE-ALIGNED STRENGTHS

- Measurement implementation:** GA4, Google Tag Manager, data layer specs, e-commerce events, conversion/key events, consent mode, server-side tagging, QA, and tracking documentation
- E-commerce + Shopify:** Shopify and e-commerce tracking for product views, cart behavior, checkout steps, purchases, lead forms, quote/RFQ-style funnels, and revenue reporting
- Feeds + Merchant Center:** Google Merchant Center, product-feed troubleshooting, Shopping/PMAX data needs, structured product data, disapprovals, and catalog-quality checks
- Ad platform tracking:** Google Ads, Meta, LinkedIn, and Microsoft Ads conversion tracking, enhanced conversions, offline conversion imports, server-side tracking, and signal-quality checks
- Reporting + reconciliation:** BigQuery, SQL, Looker Studio, Power BI, QuickSight, Metabase, CRM/e-commerce/ERP reconciliation, KPI definitions, and dashboards that answer real business questions
- Client-facing work:** discovery calls, scope definition, stakeholder updates, developer handoffs, implementation notes, and clear explanations when the data does not line up

PROFESSIONAL EXPERIENCE

FOCO — GTM Systems & MarTech Consultant

Self-employed / Contract Consultant | Orlando, FL / Remote | Jan 2025–Present

- Run a small GTM systems and analytics consultancy supporting 20+ clients across e-commerce, B2B SaaS, healthcare, and agency environments.
- Build GA4/GTM tracking plans, conversion-event definitions, UTM standards, server-side tagging approaches, consent requirements, CRM handoffs, and dashboard requirements from discovery through implementation.
- Support e-commerce and Shopify measurement needs including product-page behavior, cart and checkout events, lead and quote forms, feed/catalog data quality, Shopping campaign inputs, and cross-platform conversion checks.
- Audit analytics setups, find duplicate or missing conversions, write data layer requirements, QA developer implementations, and turn the fixes into practical roadmaps clients can actually follow.

Freeman+Leonard — HubSpot & Marketing Operations Consultant

Contract Consultant | Remote | Feb 2026–Present

- Support HubSpot marketing operations across campaign execution, audience segmentation, forms, lists, CRM workflows, lifecycle automation, and performance reporting.
- QA form logic, workflow triggers, suppression rules, attribution fields, and reporting paths so campaign data is cleaner and easier to trust.
- Work with non-technical stakeholders to turn campaign, sales, and reporting requests into clean HubSpot setup and repeatable operating processes.

Macabacus — MarTech & Marketing Analytics Consultant

Contract Consultant | Orlando, FL / Remote | Nov 2025–Aug 2026

- Owned GA4, Google Tag Manager, cookie consent, attribution tracking, campaign events, and A/B test measurement for the marketing team.
- Implemented server-side tracking via Stape with conversion API integrations for Meta, LinkedIn, and Microsoft Ads to improve signal quality and reduce browser-side tracking loss.
- Managed HubSpot, Salesforce, CRM, and data-platform integrations, including API workflows, sync rules, enrichment, and automation through Zapier and Make.
- Gave practical tracking guidance and platform training to marketing, sales, RevOps, product, engineering, and data stakeholders.

Laughlin Constable — Google Analytics & Piwik PRO Consultant

Contract Consultant | Orlando, FL / Remote | Nov 2025–Feb 2026

- Advised healthcare and regulated clients on whether Google Analytics or Piwik PRO better fit their compliance, data ownership, and reporting needs.
- Designed privacy-conscious event tracking and reporting structures while helping internal teams avoid protected health information capture.
- Presented clear platform tradeoffs and analytics governance recommendations to stakeholders evaluating compliant measurement options.

Logisolve — Matomo Implementation Consultant

Contract Consultant | Orlando, FL | Nov 2025–Jan 2026

- Led Matomo implementation discovery and wrote a roadmap for dashboards, reporting, event taxonomy, Tag Manager setup, and Angular SPA tracking requirements.
- Researched SPA route-change tracking, tested event configurations, advised on HIPAA-conscious analytics practices, and finished implementation planning in under two months.

tmp — Google Analytics Consultant

Contract Consultant | Orlando, FL / Remote | Apr 2025–Dec 2025

- Managed GA/GTM tracking across web analytics, paid media, and reporting platforms during an 8-month engagement.
- Implemented and maintained paid media tags, including The Trade Desk, inside Google Tag Manager; built QuickSight/Metabase dashboards and a Meiro-based Google Ads data pipeline.

Chamberlain Group — Senior Marketing Analytics Engineer

Oak Brook, IL / Remote | May 2024–Dec 2024

- Built BigQuery/SQL dashboards for support and myQ app KPIs, helping improve case-resolution efficiency by 15% through faster visibility into user behavior and operational performance.
- Managed national campaign analytics with GA4 and Kochava, tracking clicks, downloads, registrations, installs, and revenue-adjacent events for conversion analysis and ad spend decisions.
- Led Optimizely A/B tests for paid landing pages, driving a 25% lift in conversion rate and 15% bounce-rate reduction.

Chamberlain Group — Marketing Data Analyst

Oak Brook, IL / Remote | Jun 2022–May 2024

- Built Power BI dashboards integrating LinkedIn, SAP, Pardot, Salesforce, and Google Analytics data, improving lead attribution accuracy by 25%.
- Implemented Tealium and Google Tag Manager tracking to improve campaign reporting, audience segmentation, and measurement consistency.
- Built a Databricks/SQL attribution pipeline from Kochava into BigQuery, reducing manual data processing time by 40%.

Trustmark — Google Analytics Consultant

Contract Consultant | Remote

- Supported a multi-domain GA4 migration by rebuilding event taxonomies and measurement structures so enterprise reports stayed usable after the move.
- Built Looker Studio dashboards combining GA4 and tag-level data for visibility into traffic, engagement, funnel performance, and conversions.
- Developed custom JavaScript tags in Google Tag Manager to track form abandonment, lead-generation drop-off points, and other funnel behaviors.

Trellist Marketing and Technology — Digital Analytics Consultant

Wilmington, DE / Remote | Jul 2021–May 2022

- Developed GA4/GTM-style tracking, SQL ETL scripts, Python reporting automation, and Google Data Studio dashboards for multi-product analytics.

- Led software and marketing operations projects across QA, technical SEO, analytics dashboards, email marketing, product launch work, HubSpot dashboards, and client reporting.

Earlier Digital Marketing & Analytics Roles

Marriott Vacations Worldwide, Darden, Virtual Stacks, TechnodealsUSA | 2017–2021

- Supported digital campaign operations, ecommerce initiatives, QA/UAT, conversion tracking, SEO/PPC analytics, landing-page testing, and email/marketing automation.
